

NEEDLEPUNCH

Proudly Presented by:  **SYNTEC**[®]

Delivering the one-two punch of beauty and brawn, this revolutionary Syntec fabric is perfect for a variety of marine applications including walls, floors, and trailer bunks. It also makes a great liner for hulls, trunks and cargo spaces. Serving the landlubber market? Needle punch fabrics work great for RV and automotive uses too.

Needle punch is crafted from a proprietary blend of polyester and polypropylene, and comes in a variety of styles, colors and widths. Plus, it's lightweight design allows the fabric to be cut and molded to fit any desired size or shape for easy installation.

- Designed to whether marine and outdoor environments
- Withstands fraying and tearing
- Resists molds and mildew
- Contemporary color and style options available

Ask your Syntec sales rep about available color options and fabric widths.

It's a Knockout

With a lightweight design and a heavyweight performance, Needlepush fabrics are made for both easy installation and extreme weather conditions. Needlepush complements and fortifies any boat, withstanding water exposure, the elements, and all the other rigors of boating. And it looks good doing it.

Needlepush can be easily tailored to fit custom dimensions, offering wall-to-wall coverage. It's ideal for floors too, and is equally at home in trunks, trailers, and cargo spaces.

Talk to your Syntec rep to discover how Needlepush can protect and beautify your boats.
