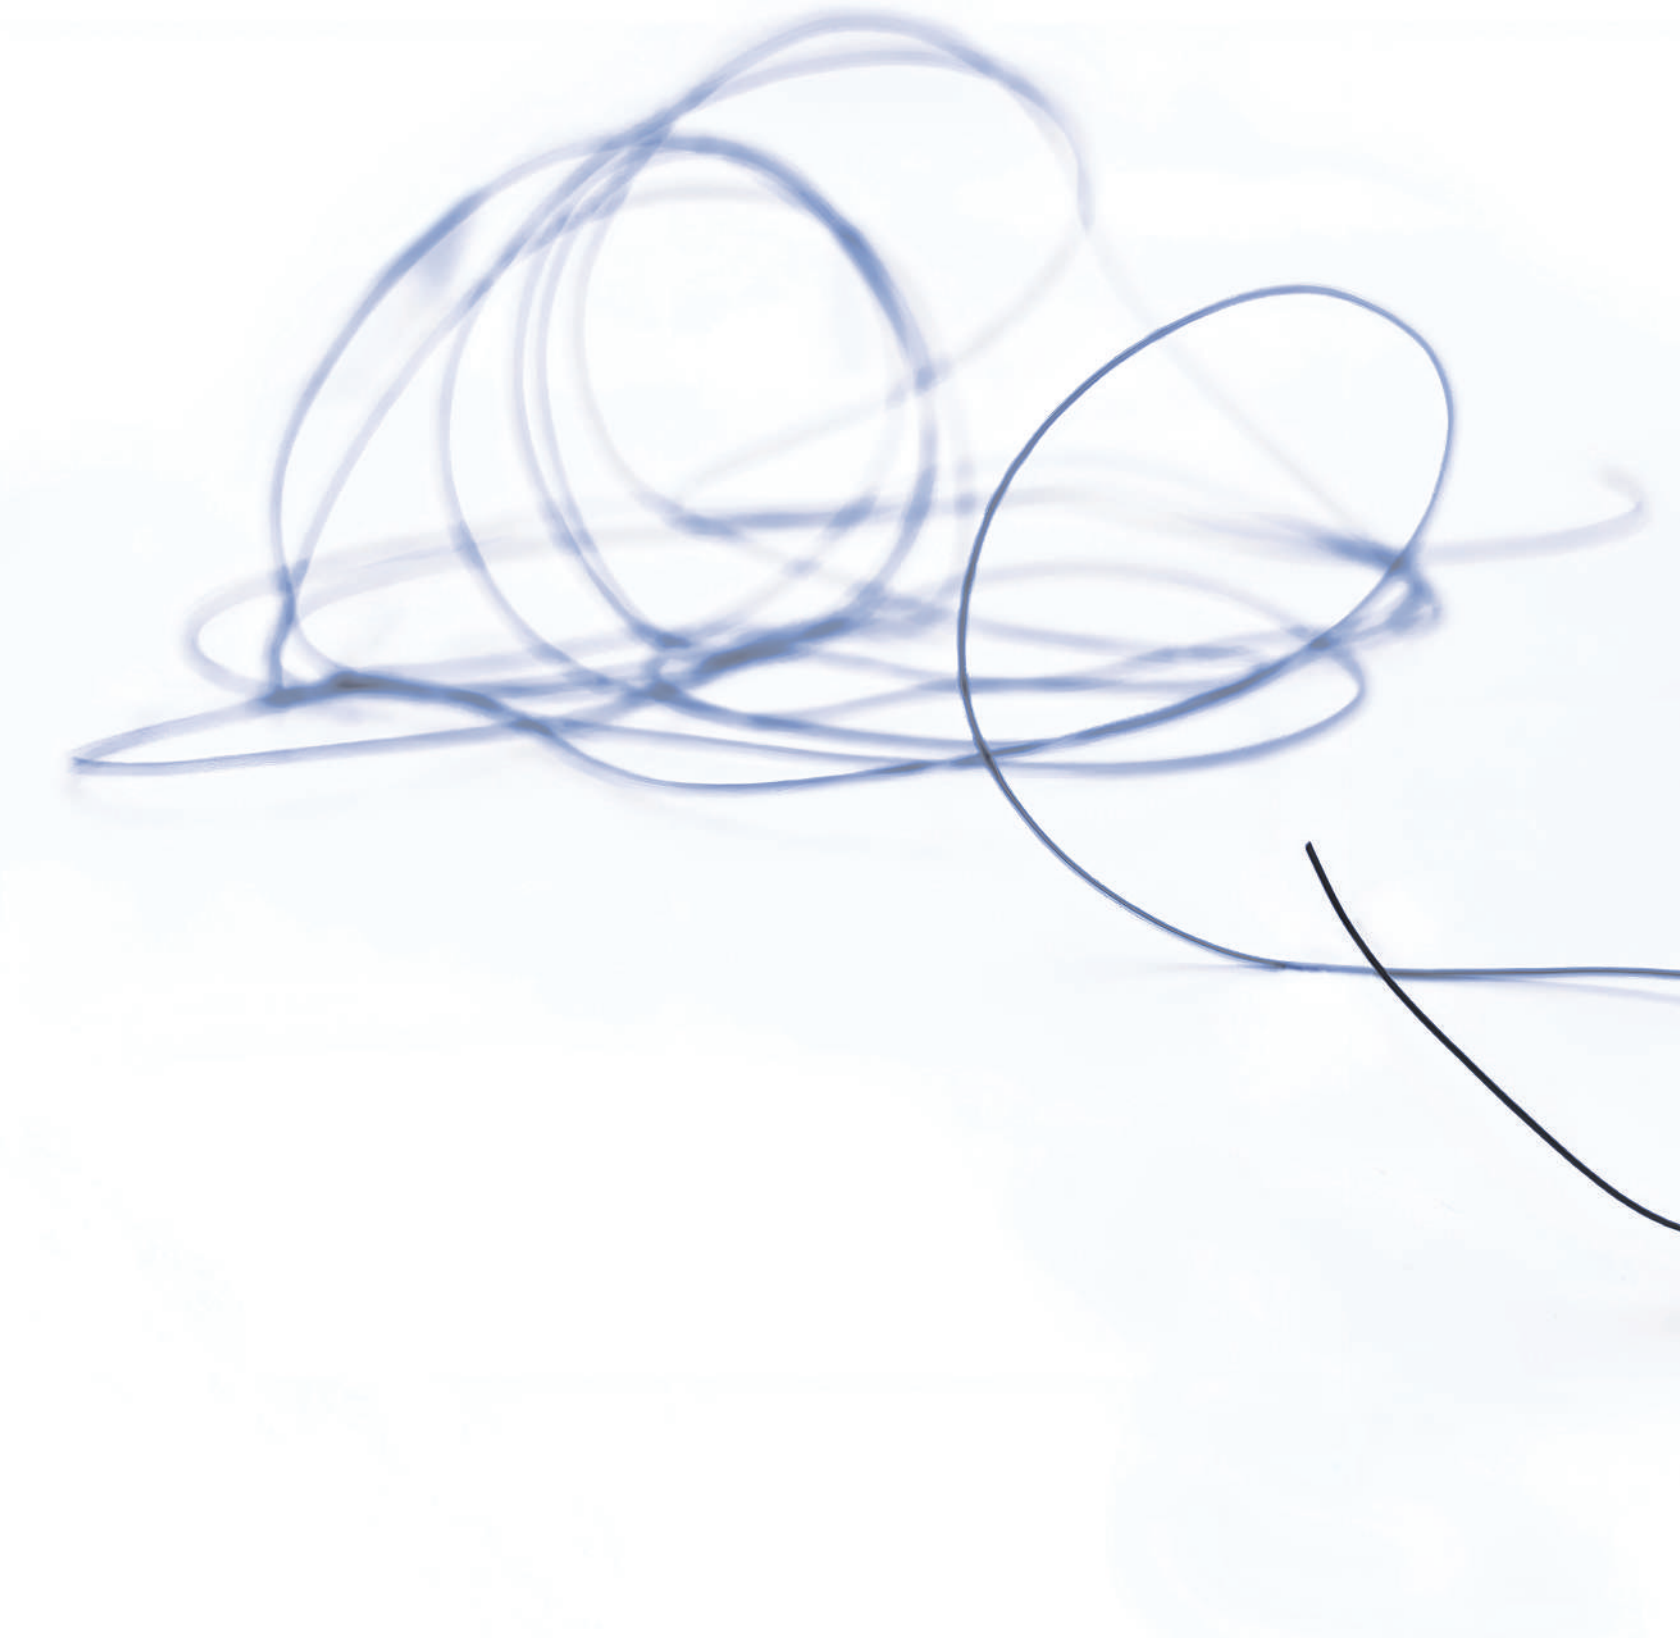
SYNTEC®

We Design.

We Create.

We Perform.



SENSATIONS

LIMITLESS DESIGN BY SYNTEC

Fiber has higher expectations than ever before. It needs to have an aesthetic quality, visual interest and tactile hand, while providing unparalleled performance and durability.

We believe that design is most successful when the manufacturing process is paired with a clear performance intent. Whether it's a problem to be solved or an objective to be met, good design is an everlasting pursuit.

It's why we work diligently at the production level to understand – and ultimately influence – how our materials will perform in their environment.

We offer the industry more personalization in designs and colors to ensure our flooring always suits you.

SENSATIONS

LIMITLESS DESIGN BY SYNTEC

Sensations by Syntec delivers exceptional performance, stunning aesthetics, and a comfortable tactile experience. Available in a variety of patterns, this unique material looks beautiful on any boat, yet is tough enough to weather any condition.

Sensations isn't just functional, it's also beautiful. Available in a variety of unique and eye-catching patterns, Sensations offers style that goes the extra nautical mile. Because Sensations is tough enough to weather the rigors of boating and natural elements like rain and sun, its good looks won't fade over time.

What is Sensations?

Sensations is a woven vinyl textile produced on state of the art Jacquard looms. Woven in both 8'6" and 12' widths, Sensations can accommodate multiple flooring widths.

The fabric begins as a polyester core that runs through an extrusion process where it is coated with a PVC resin. It's this PVC coating that makes the product durable allowing it to perform under the harsh elements experienced in the great outdoors.

The PVC coating paired with the density at which the fabric is woven provides strength and dimensional stability making Sensations the ideal flooring solution for the boating and marine industry.

- Resistant to mold, mildew, tearing, and abrasion
- Withstands 3,000 hours of UV exposure
- Meets 302 flammability requirements
- Resists negative effects from Ozone and most chemicals

Refined Color

Sensations Woven PCV textiles deliver exceptional performance, stunning aesthetics and a comfortable, tactile experience. Produced on Jacquard looms, our intricate patterns blend rich textures with a refined color palette.

Syntec is proud to feature Sensations patterns that truly push design boundaries, taking their inspiration from ocean surfaces, industrial metallics, sculptural shapes and teak wood favorites.

In combination with beautiful color choices and an attention to luxurious detail, Sensations boldly leaps forward as an innovative enhancement to your nautical masterpiece.

For custom designs and colors, contact your Sensations Sales Representative by calling **800-526-8428**, or by email at **syntecinfo@syntecind.com**.

AURORA

SPECIFICATIONS:

Standard Width	8' 6"
Standard Length	~155' roll (Roll length varies)

PERFORMANCE TESTING:

FVMSS & CMVSS 302 Flammability Test
Meets or exceeds Federal Motor Vehicle Safety Standard No. 302

ASTM D-5252 Hexapod Drum Test
Exceeds Heavy Commercial Traffic Rating

ASTM D-3884 Abrasion Resistance Test
Abrasion Resistance

ASTM C-1028 Coefficient of Friction (Slip Resistance) Test
Slip resistant and ADA Compliant

ASTM F-925 Stain Resistance to Chemicals
Zero effect or staining when exposed to chemical staining test

Just as enticing as the dancing northern lights, is the subtle pattern that waltzes across Sensations' Aurora. The Milky Way appears from behind the colorful curtains in this beautiful and organic pattern.

CAVALIER

SPECIFICATIONS:

Standard Width	8’ 6”
Standard Length	~155’ roll (Roll length varies)

PERFORMANCE TESTING:

FVMSS & CMVSS 302 Flammability Test
Meets or exceeds Federal Motor Vehicle
Safety Standard No. 302

ASTM D-5252 Hexapod Drum Test
Exceeds Heavy Commercial Traffic Rating

ASTM D-3884 Abrasion Resistance Test
Abrasion Resistance

ASTM C-1028 Coefficient of Friction (Slip Resistance) Test
Slip resistant and ADA Compliant

ASTM F-925 Stain Resistance to Chemicals
Zero effect or staining when exposed to chemical staining test

Dynamic intersecting lines create the illusion of shade and provide texture in Cavalier. Featuring the robust durability of woven fabrics, this unique interplay produces deep tones and distinctive dimensionality. Cavalier adds elegance and tactility to a surface that can sometimes be regarded as utilitarian.
