

DECKING reINVENTED

reFLEX has reinvented the traction decking market! First, reFLEX is manufactured with a high-density, closed cell polyethylene (PE) foam that has been proven to out-perform the EVA and cross-linked foams out there. Then, reFLEX takes it to another level by creating truGRAIN, an exclusive manufacturing process that adds several proven performance enhancements. It's a difference that you can **SEE and FEEL!** A bold step forward in flooring.

INNER STRENGTH

Marine & Golf flooring demands better, and with reFLEX, we deliver. reFLEX provides a one-of-a-kind look and feel with unmatched performance characteristics. reFLEX has been third party tested and proven to outperform the competition in UV exposure, dimensional stability, stain resistance, peel strength, and durability. reFLEX with truGRAIN not only looks better on the outside, its built from within to give you the most durable traction flooring available.

PRECISE DIGITIZATION

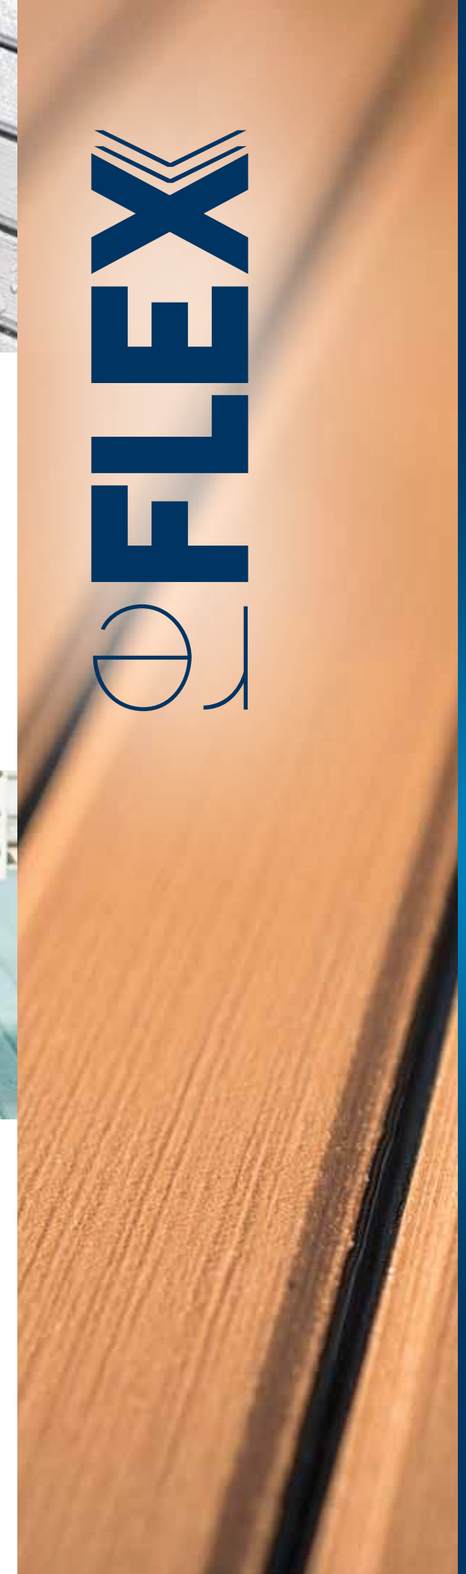

reFLEX's Design Team has created an unmatched service level for all your design needs. No more clunky machinery, templates, and back and forth to ensure a design fits on your marine or golf floor.

reFLEX now offers a state-of-the-art digitizing process that takes all the guess work and time, out of the equation. A reFLEX representative can come to you and digitize your boat, insuring accuracy and speed. We measure... we make it. Relax, its reFLEX.

QUALITY CUSTOMIZATION

When it comes to customization, reFLEX places you in the driver's seat! reFLEX is available in a variety of styles and colors, and can be trimmed to your preferred size and thickness. You can also personalize your pads with custom designs, logos and patterns.

Your unique design will be cut into your pads on reFLEX's innovative, in-house computer numeric control (CNC) and laser etching machines to ensure the highest-quality design.

YOUR RIDE IS OUR BUSINESS

ON WATER OR ON WHEELS.

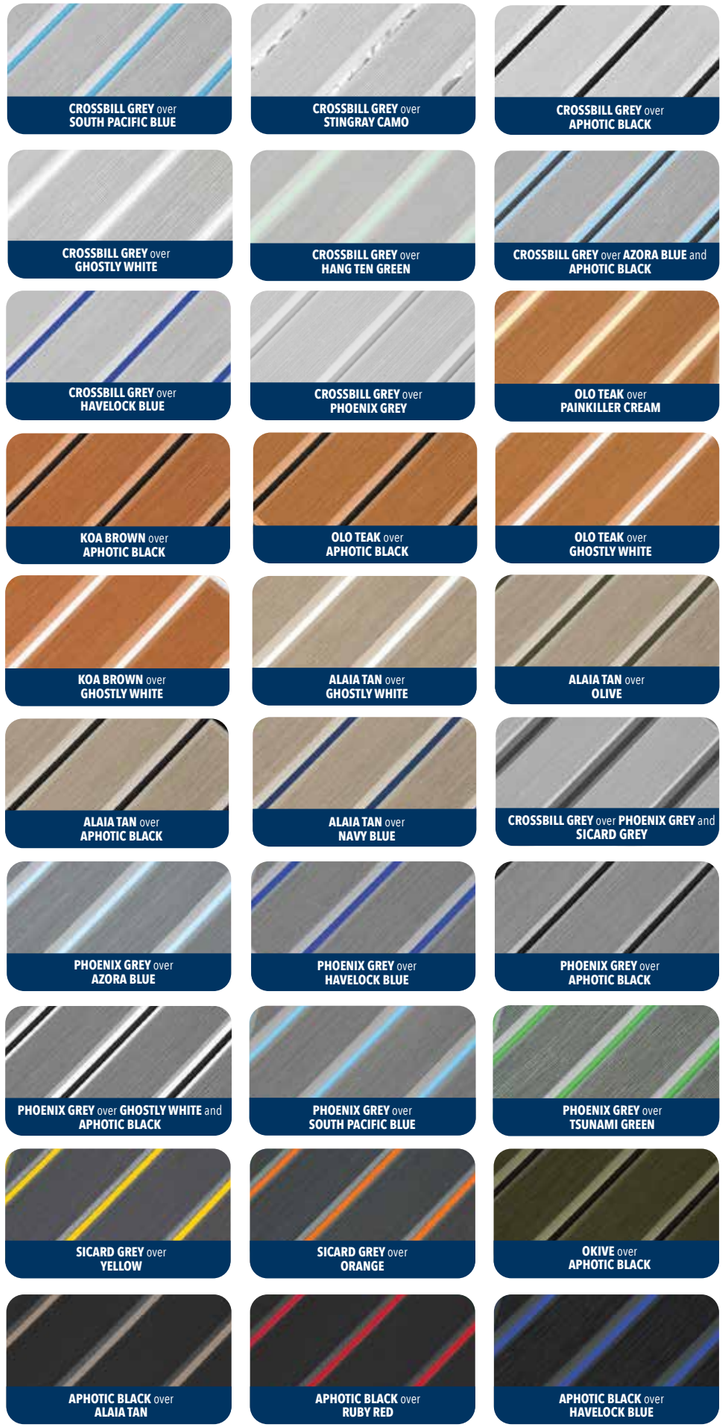

Whether you're navigating open water or cruising the golf course, your vehicle's surfaces take a beating from the elements and constant use. That's why you need traction decking that's not just durable and non-slip, but also stylish and comfortable underfoot.

reFLEX delivers it all – and then some. Perfect for boats and golf carts, reFLEX PE foam decking enhances swim platforms, helm stations, floors, steps, railings, coaming bolsters – even cooler tops and golf cart footwells!

Built from tough, weather-resistant Polyethylene (PE) foam, reFLEX helps today's captains and cart enthusiasts alike perfect their ride – with performance you can feel and looks you'll love.
