Polyurea: Built for the Demands of Marine Life

Polyurea isn't just tough—it's one of the most durable coatings available today. This two-part protective layer goes on fast, cures quickly, and creates a seamless, waterproof shield. The result? Long-lasting protection that stands up to the toughest marine conditions.

Key Applications

Boat Flooring & Decking
- Slip-resistant surface for safer footing.
- Protects aluminum, fiberglass, and wood subfloors.
- Easy to clean after fishing, sand, or heavy use.

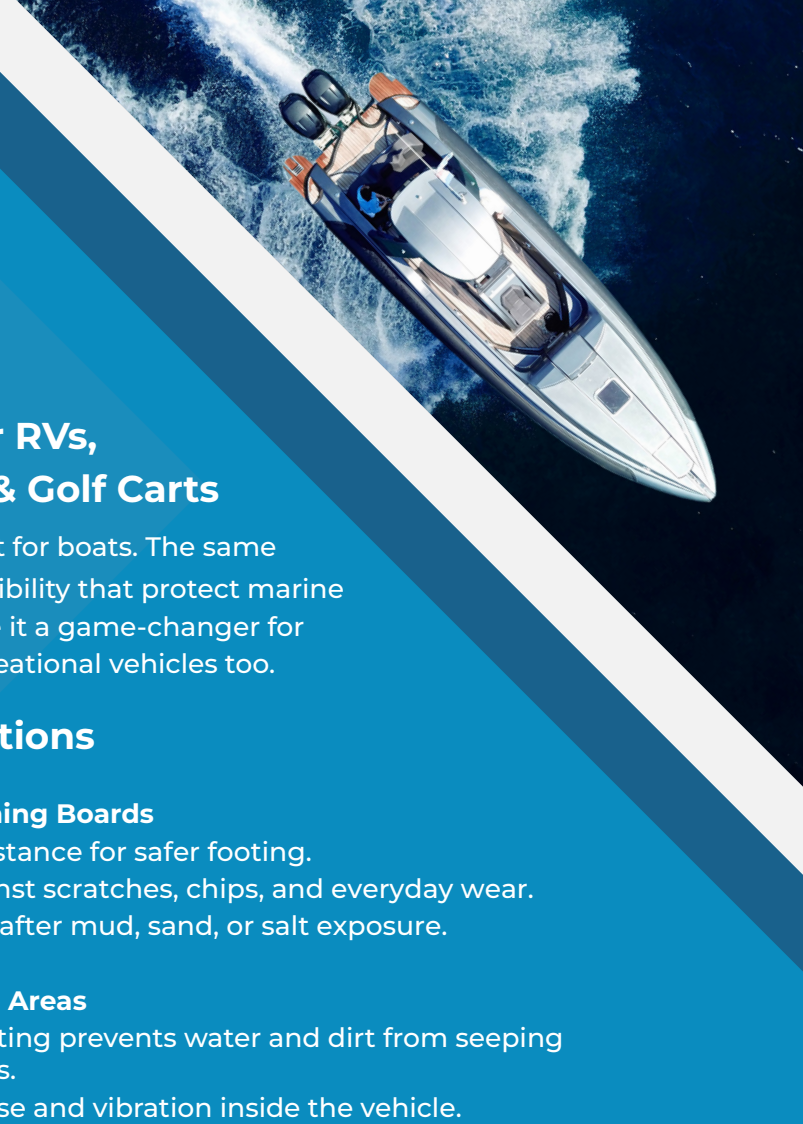

Engine Compartments
- Shields against corrosion from heat and moisture.
- Dampens noise and vibration.
- High-visibility finish makes inspection easier.

Pontoon Sub-Flooring
- Waterproof barrier prevents rot and delamination.
- Extends life of flooring systems.
- Reduces maintenance costs over time.

Boat Trailers
- Corrosion protection for galvanized and steel frames.
- Improves appearance with a clean, uniform finish.
- Slip resistance for safer loading/unloading.

Why Choose Polyurea?

Polyurea offers a smarter, cleaner alternative to traditional coatings. It contains no VOCs, making it environmentally safe with zero harmful emissions. Production will be faster with quick curing times offering both a strong and flexible barrier, built to withstand impact, abrasion, and the harshest environments without cracking or peeling.

Polyurea for RVs, ATVs, UTVs & Golf Carts

Polyurea isn't just for boats. The same strength and flexibility that protect marine equipment make it a game-changer for off-road and recreational vehicles too.

Key Applications

Step-Ups & Running Boards
- Adds slip resistance for safer footing.
- Protects against scratches, chips, and everyday wear.
- Easy to clean after mud, sand, or salt exposure.

Flooring & Cargo Areas
- Seamless coating prevents water and dirt from seeping into sub-floors.
- Dampens noise and vibration inside the vehicle.
- Stands up to heavy loads, tools, coolers, and gear without gouging.

Exteriors & Trim
- Durable alternative to paint for high-impact zones (fenders, bumpers, rockers).
- Shields against rust and corrosion in wet or muddy environments.
- UV-stable for long-lasting color and finish.

Trailers & Utility Beds
- Slip-resistant surface for loading gear.
- Corrosion protection for exposed metal parts.
- Tough enough to handle constant impact and abrasion.
