Modern Texture. Timeless Durability.

The NEW Twistex Textured Marine Carpet line introduces a disruptive advancement in marine flooring, featuring twisted polypropylene fibers designed specifically for performance and aesthetics. This proprietary construction creates a multi-dimensional textured surface that enhances both the visual appeal and tactile experience. Engineered for durability, comfort, and longevity, this new product line represents the first major innovation in marine carpet technology in decades.

NEW SENSATIONS
ELEVATE

Elevate your deck with Syntec’s Polypropylene Marine Carpet Fiber (MCF). Its soft, cool-touch fibers resist fading and discoloration, while a raised tufted design adds rich texture and luxury-inspired style. Durable and designer-driven, this flooring blends comfort, performance, and sophistication for life on the water.

NEW SENSATIONS
MCF HYBRID COLLECTION

Woven for Comfort. Engineered for Performance.

Experience comfort and style with Syntec’s woven marine carpet. Crafted from soft Polypropylene Marine Carpet Fiber blended with durable PVC yarns, it offers a cushioned feel underfoot with the strength to endure life on the water. Naturally heat- and UV-resistant, the fibers stay cooler in the sun and guard against fading and discoloration.

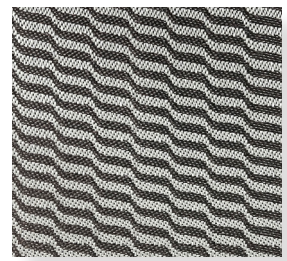

GLINT

Glint evokes sunlight on water, with irregular shapes that dance like fleeting light.

ELODEA

Elodea combines an ink-drawn wave with a flowing leaf motif, evoking the dreamy sway of underwater plants.

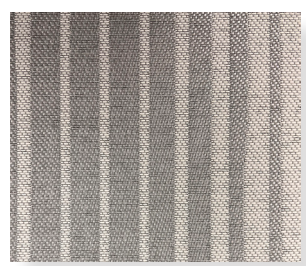

OLA

A soft wave that gently rolls endlessly, Ola is like a meditation, breathing in and out, tides coming and going.

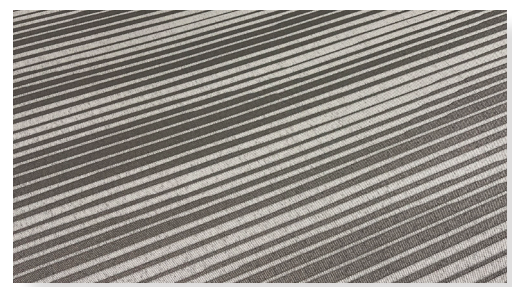

CREEL

Creel expands the traditional fish basket weave with bold accent bands.

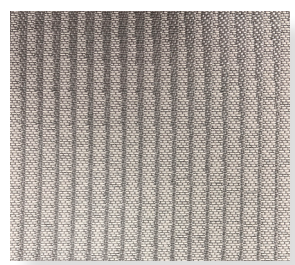

VIA

Via is a striking large-scale design, with vertical lines that grow and taper to create a sense of movement and flow.

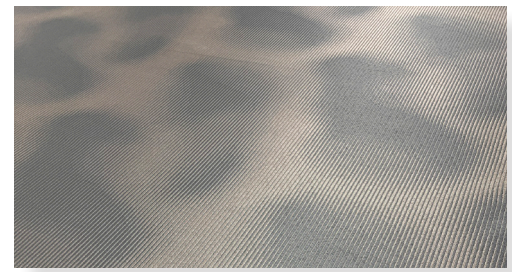

VIA SCALE

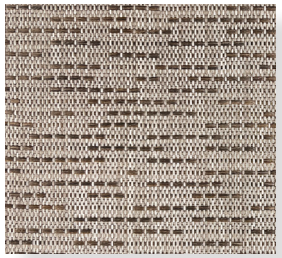

LAGO

The Lago design draws from the coming and going shadows on the water and the mystery of what’s below the surface.

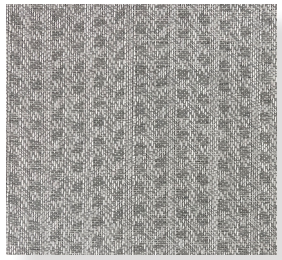

LAGO SCALE

DROPLET

Inspired by tiny drops of water, like dew in the morning, Droplet motifs race across the width, coming and going interwoven into the carpet.

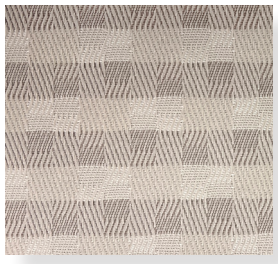

SEINE

Some of the earliest textiles humans ever created were nets made to catch fish, the Seine pattern inspired by this rich tradition. Seine's interlacing lines recall both utility and beauty.

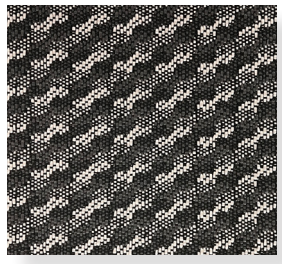

NEW SENSATIONS
100% MARINE CARPET FIBER

Experience next-level comfort with our 100% MCF woven marine carpet. Soft yet resilient, it stays cooler in the sun, resists UV fading, and delivers lasting performance with modern style options.

TROTLINE

Like a trotline, this pattern has a clean, rhythmic repeat that balances structure and flow.

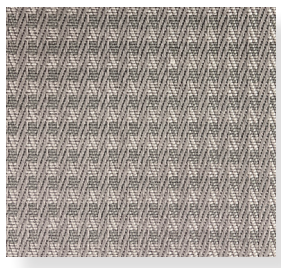

REED

Inspired by the diagonal twill of a fishing basket, the Reed design adds a rounded incline that creates soft, flowing movement.

REFRACT

The checkerboard is classic and familiar but here it is veiled in a subtle wave that mimics the refraction of light on the water.

CASTER

Inspired by wool cable-knit sweaters, Caster offers a classic, tailored textile look.

PLANTASOL

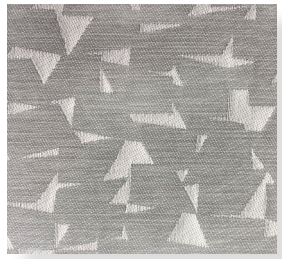

Born from a sunprint on photosensitive paper, Plantasol layers a wave pattern over shadowy plant forms, merging flora and water in a dreamy design.

PLANTASOL SCALE

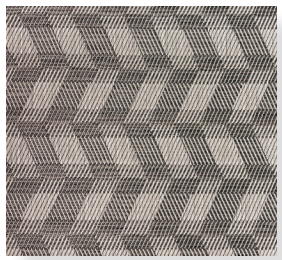

SENSATIONS
LIMITLESS DESIGN BY SYNTEC

The original Sensations by Syntec delivers exceptional performance, stunning aesthetics, and a comfortable tactile experience. Available in a variety of patterns, this unique material looks beautiful on any boat, yet is tough enough to weather any condition.

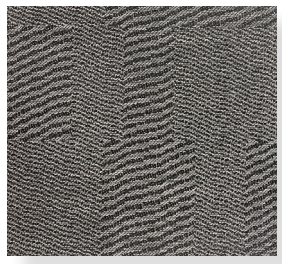

ANGLER

Angler is a dynamic design built from sharp, angular forms that create a crisp, rhythmic pattern.

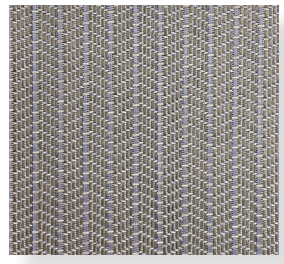

RIO

With images of a swift river in mind, Rio catches the perpetual movement of water, re-imagined as a crisp graphic.

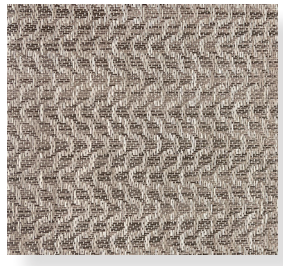

WAKE

When a boat cuts through the water, it leaves a wake—broken waves forming a soft, organic geometric pattern.

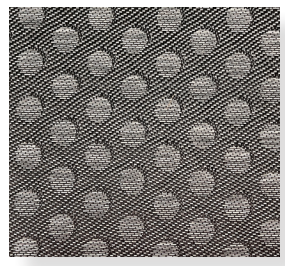

SWAY

Sway re-imagines the classic herringbone with bicolor yarn, adding softness and gentle side-to-side movement.

BEACH COMBER

Inspired by ripple patterns left in the sand after the tide goes out, Beachcomber's small-scale rhythm mirrors the delicate traces of water's subtle echoes.

MOONSHELL

A playful polka dot in which the lively dots dance across the surface, evoking a sense of motion and joy. Their small scale creates a lighthearted rhythm
